	Examiner Venkatesh Haliyur	Art Unit 2664	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1 – 10 have been examined.

Priority

2. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. JAPAN 2001- 43680 02/20/2001.

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Isaka [US Pat: 5,740,373].

Regarding claims 1,6, Isaka in the invention of "Packet Switching System Having Communication Control Unit for Sending Acknowledgement to the Source upon Receiving the Receive Response Data Associated with the last Cell" disclosed a packet switching system [Fig 1] comprising a packet receiver and transmitter [items 100,102 of Fig 1 & Fig 7] with storing unit [item 708 of Fig 7] for storing packets to be transmitted separately for each destination in sequence, a control unit [item 706 of Fig 7] for stopping packet transmission for a

predetermined period of time to a destination to which the packet transmission by the transmitting unit is failed [column 3, lines 7-43, column 5, lines 3-23].

Regarding claims 2,7, Isaka disclosed that the packet transmission control is passed to other transmitting nodes to send packets to other destinations when a transmission to a failed node was detected (interrupted) or when data to be sent is available at the node [column 6, lines 45-56].

Regarding claims 3,8, Isaka disclosed that the packet transmitter system judges that the packet transmission has failed when a response for the transmitted packet is not received within a predetermined period of time [column 6, lines 21-44].

Regarding claims 4,5,9,10, Isaka disclosed that their packet transmitter system judges that the packet transmission has failed when a response message shows that the transmitted packet is received successfully or not [column 7, lines 57- 67].

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art in reference here is Isaka.
